

NEW CELEBRATIONS AT FPT INDUSTRIAL: IN THE YEAR OF IVECO'S 50TH ANNIVERSARY, THE BOURBON-LANCY PLANT OPENS ITS DOORS TO CELEBRATE OVER 150 YEARS OF HISTORY

Turin, Italy, July 21st, 2025

It's celebration time once again at **FPT Industrial**: over the weekend, the Iveco Group brand welcomed guests to its **Bourbon-Lancy plant** to continue the celebrations for **IVECO's 50th anniversary** – while also shining a spotlight on **another historic milestone**, underscoring FPT Industrial's longstanding presence within France's industrial landscape. In fact, the **Bourbon-Lancy plant has surpassed 150 years of operation, fifty of which have been within the IVECO family and, since 2005, under the FPT Industrial brand.**

Over the weekend, the Bourbon-Lancy plant hosted a Family Day, opening its doors to FPT Industrial employees and their families, who had the opportunity to explore a historical journey featuring more than forty vehicles, engines, and parts on display.

PRESS RELEASE

Sylvain Blaise, President of Iveco Group's Powertrain Business Unit, commented: *"Today, we gather to recognize a remarkable milestone reached by FPT Industrial and to celebrate it alongside IVECO's 50th anniversary. From this standpoint, celebrating 150 years of this plant takes on even greater significance, shining new light on how the success of the IVECO brand*

is rooted in stories of excellence that go even further back in time. The story of the Bourbon-Lancy plant is undoubtedly one of these. Today, this facility stands as a true manifesto of FPT Industrial's excellence – the result of a winning formula that combines human talent with cutting-edge technology and innovation. Here, 1,200 people work every day with passion and dedication, transforming raw materials into engines that power the world."

The history of the Bourbon-Lancy plant began in **1874**, when it quickly became a **key production hub for early innovations in the agricultural sector**. From the mid-20th century, the site expanded its industrial and business footprint through **diversification** – including its acquisition by SIMCA to manufacture SOMECA tractors. **In 1975, the plant was acquired by IVECO**, marking the beginning of its specialization in the production of internal combustion engines. Just 22 years later, in 1998, it became the **birthplace of one of the most iconic and innovative engine ranges in FPT Industrial's history**: the **CURSOR** engine family. CURSOR 8 and CURSOR 10 were the first diesel engines in the heavy-duty transport sector with a variable geometry turbocharger (VGT), optimizing the airflow into the engine. The CURSOR series introduced a new concept, new materials, new components, and advanced electronics, defining an innovative approach to heavy-duty engines through cutting-edge design and engineering choices. The DNA of these engines was further shaped with the introduction of new models and displacements, leading up to the launch of the latest addition to the CURSOR family – unveiled in 2022 and further enhanced with the Model Year 2024 version – the **XCURSOR 13**, FPT Industrial's first multi-fuel single base engine, offering best-in-class power, torque, and braking power, and one of the most relevant parts of Iveco Group's decarbonization program.

The Bourbon-Lancy plant now stands as a **flagship of FPT Industrial's excellence and global heritage**, playing a key role in the brand's production value chain, as well as a **symbol of French industrial manufacturing and a key contributor to the local economy and employment landscape**. A factory where the skills and passion of over 1,200 dedicated professionals meet cutting-edge technologies ensuring the highest standards of production quality. Thanks to this unique combination, the plant achieved **World Class Manufacturing Gold Level in 2021** — the highest possible recognition for operational excellence. In 2022, it adopted the DOT (Driving Operations Together) program, a results-driven initiative designed to optimize global operations. The program focuses on enhancing safety and quality standards, while improving performance across the brand's entire industrial footprint and fostering a culture of continuous improvement and excellence.

FPT Industrial is a brand of Iveco Group N.V. (EXM: IVG), dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications. Over 8,000 people across ten production sites and ten R&D centers work for FPT Industrial all around the world. Active in nearly 100 different countries, its global sales and its Customer Service department supports all Brand customers. The extensive product offering includes six engine ranges with power outputs from 30 hp to over 1,000 hp, transmissions with torque up to 500 Nm, and front and rear axles from 2.45 to 32 tonne GAW (Gross Axle Weight). FPT Industrial offers the most complete line-up of natural gas engines for industrial applications on the market, with power outputs ranging from 50 to 520 hp. A dedicated ePowertrain division is accelerating the path towards net zero-emissions mobility, with electric drivelines, battery packs, and battery management systems. This extensive offering, and its strong focus on R&D, makes FPT Industrial a world leader in industrial powertrains and solutions. For more information, visit www.fptindustrial.com.
