

Press Release

123Bus chooses IVECO BUS EVADYS to support the German Women's National Basketball Team at the 2026 FIBA Women's Basketball World Cup

Vénissieux, 8th September 2026

123Bus is relying on the versatility and comfort of the IVECO BUS EVADYS for the 2026 FIBA Women's Basketball World Cup taking place in Berlin from 4 to 13 September 2026. As an official event partner, 123Bus is responsible for the mobility of various participants and is deploying, among other vehicles, a specially branded EVADYS coach for the German Women's National Basketball Team.

The 13-metre EVADYS, featuring a dedicated livery for the occasion, accompanies the national team during its first preparation games and official engagements in Berlin. The coach provides transfers between the airport, hotel and training facilities, as well as transport for other activities linked to the event's preparations.

"We are proud that 123Bus has chosen our EVADYS for this mission. Comfortable, reliable and versatile, the EVADYS is ideally suited to the demanding requirements of event transport. We are pleased to support the German Women's National Basketball Team on this journey together with 123Bus, and we wish them every success in the competition," said Giorgio Zino, Head of Commercial Operations IVECO BUS Europe.

Versatility across a wide range of applications

A true benchmark in versatility, the EVADYS adapts with ease to a wide variety of passenger transport missions. Comfortable, reliable, and high performing, it supports operators across all types of routes while providing passengers with a comfortable, smooth, and relaxing travel experience.

From shuttle services, club and group travel, and school trips to excursions, tourist day tours, occasional transport services, and long-distance scheduled routes, the EVADYS is designed to support a wide spectrum of applications. Its versatility also enables operators to use the same vehicle across different types of operations, from scheduled or shuttle services during the week to tourism and charter services at weekends and during holiday periods.

This operational flexibility makes EVADYS an economically attractive solution for operators looking to cover a wide variety of passenger transport missions with a single vehicle.

Comfort and well-being on board

The EVADYS deployed by 123Bus in Berlin features a configuration perfectly suited to the requirements of team and staff transport. The coach is equipped with 53 comfortable passenger seats, a hostess seat and a generous luggage compartment offering 9.3 m³ of capacity, complemented by overhead luggage racks providing an additional 1.9 m³ of storage space. Its central door facilitates passenger circulation and supports efficient boarding and alighting.

Designed for long-distance travel, the EVADYS also incorporates a range of onboard comfort features. These include a centrally located toilet and a kitchenette equipped with a coffee machine, water boiler and hot sausage cooker. These features further enhance the passengers' sense of comfort and well-being.

A successful cooperation with 123Bus

The operation in Berlin illustrates the quality of the cooperation between IVECO BUS and 123Bus and demonstrates EVADYS's suitability for demanding event transport missions. With its dedicated livery, passenger capacity and onboard equipment, the coach combines the flexibility required by operators with the comfort expected by passengers.

For 123Bus, the EVADYS provides a versatile solution perfectly suited to the requirements of the German Women's National Basketball Team throughout its activities during one of the major international basketball events of 2026.

IVECO BUS

IVECO BUS is a brand of Iveco Group N.V. (EXM: IVG), a global leader in commercial and specialty vehicles, powertrain, and financial services, listed on the Borsa Italiana in Milan. IVECO BUS designs, manufactures, and markets a wide range of vehicles covering all missions: city, intercity, school transport, line service and tourism.

With a worldwide presence and a leading position in Europe in sustainable public transport, IVECO BUS supports private transport operators and public transport authorities in their energy transition with a technology-neutral approach that includes all energies: biofuel, biomethane, battery electric and fuel cell technologies.

With an extensive service network, IVECO BUS guarantees worldwide assistance wherever an Iveco Bus vehicle is in operation.

*In addition, IVECO BUS's **Energy Mobility Solutions** service and consulting offer provides customized support for the coordination of complex electrification projects.*

*A wide range of **IVECO ON** connected services, developed to optimise the operation and maintenance of all-energy vehicle fleets, completes IVECO BUS's comprehensive offering.*

The company employs over 6,550 people and operates seven manufacturing plants in Europe and Latin America: Annonay and Rorthais in France, Vysoké Myto in the Czech Republic, Brescia and Foggia in Italy, Sete Lagoas in Brazil, and Córdoba in Argentina.
