

## Press Release

### Milan chooses IVECO BUS for its transition to electric mobility

*IVECO BUS has been selected by Azienda Trasporti Milanesi S.p.A. (ATM), Milan's public transport company, for the supply of 153 E-WAY full electric buses. This tender represents the first major milestone in ATM's sustainable mobility plan which aims to electrify its fleet of buses.*

Vénissieux, 19<sup>th</sup> December 2023

The tender awarded to IVECO BUS comprises 153 electric 12-meter buses and full-service maintenance for ten years. The first deliveries are expected by the first quarter of 2025 and all the remaining buses are to be delivered by June 2026. The arrival of these E-WAY buses represents a crucial step for ATM's electrification plan, which will see half of the 1,200 buses in service being electric by 2026.

IVECO BUS's last-generation electric technology will fully meet ATM's sustainable expectations with its significant environmental benefits: zero emissions, range, and silence in operation. With its smooth driving and quiet travel experience, the E-WAY improves the comfort of drivers and passengers, as well as respecting city residents.

The E-WAY model selected by ATM is a night-time charging version equipped with the latest NMC battery technology whose single-unit capacity reaches 69.3 kWh and is industrialized in Italy by FPT Industrial.

*"We are proud to play a key role in Milan's mobility. It is an honor to support ATM in the deployment of its ambitious energy transition plan with our competitive total cost of ownership offering that includes vehicles with components provided by the Italian supply chain. This confirms our ambition and commitment to contribute to the energy and ecological transition of public transport in Italy,"* said Giorgio Zino, Head of Europe Commercial Operations.

## IVECO BUS

*IVECO BUS is a brand of Iveco Group N.V. (EXM: IVG), a global leader in commercial and specialty vehicles, powertrain, and financial services, listed on the Borsa Italiana in Milan.*

*With a worldwide presence and a leading position in Europe in sustainable public transport, IVECO BUS supports public and private operators in all their missions, with an offer of global mobility solutions available in different energies, such as electric or powered by compressed natural gas compatible with biomethane.*

*The overall offer includes:*

- school, intercity and tourism coaches;*
- standard and articulated city buses, including BRT dedicated versions; city midibuses*
- minibuses for all passenger transport missions.*
- connectivity and fleet management services available through IVECO ON*
- a portfolio of products and services with Energy Mobility Solutions, from simulations and design to the supply of charging stations, and installation and maintenance of the charging infrastructure*

*The extensive IVECO BUS and IVECO service network guarantees assistance around the world wherever an Iveco Bus vehicle is at work.*

*IVECO BUS employs over 5,000 people across five production units, in Annonay and Rorthais, France, Vysoké Myto, Czech Republic, Brescia and Foggia, Italy.*
