

Press Release

IVECO BUS delivers first 20 natural gas city buses to Córdoba, Argentina

IVECO BUS has just delivered the first fleet of natural gas-powered urban buses entirely produced in Argentina to Córdoba, Argentina. Offering up to 350 km range, these 20 vehicles provide a high-performance and sustainable urban mobility solution.

Vénissieux, November 25th, 2025

IVECO BUS is enlarging its presence to regions outside of Europe and particularly in South America, proposing its full offering of sustainable mobility solutions. The brand has delivered a fleet of 20 natural gas-powered buses to Córdoba, Argentina. This delivery, carried out with the local Overbus dealer, marks two key milestones: the introduction of the first natural gas buses in Argentina, while demonstrating the brand's commitment to local production.

First locally produced sustainable natural gas mobility solution

Equipped with the 17-210 chassis manufactured in Buenos Aires, the vehicles were produced at the IVECO BUS plant in Córdoba. The body of the new fleet was supplied by Italbus, one of IVECO BUS's main partners in the country, specializing in bodies for urban and intercity vehicles.

These first 100% Argentinian natural gas-powered buses are equipped with an FPT N60 CNG engine and offer a range of up to 350 km. This new fleet will ensure significant environmental benefits such as a 95% reduction in particulates, 90% in nitrogen dioxide, and 10% in carbon dioxide, as well as a noise reduction of up to -3dBA for quieter night services.

The delivery of these first CNG buses was also accompanied by specialized training, provided by IVECO Academy for drivers, focused on product knowledge and vehicle technology.

IVECO BUS

IVECO BUS is a brand of Iveco Group N.V. (EXM: IVG), a global leader in commercial and specialty vehicles, powertrain, and financial services, listed on the Borsa Italiana in Milan.

With a worldwide presence and a leading position in Europe in sustainable public transport, IVECO BUS supports public and private operators in all their missions, with an offer of global mobility solutions available in different energies, such as electric or powered by compressed natural gas compatible with biomethane.

The overall offer includes:

- school, intercity and tourism coaches;*
- standard and articulated city buses, including BRT dedicated versions; city midibuses*
- minibuses for all passenger transport missions.*
- connectivity and fleet management services available through IVECO ON*
- a portfolio of products and services with Energy Mobility Solutions, from simulations and design to the supply of charging stations, and installation and maintenance of the charging infrastructure*

The extensive IVECO BUS and IVECO service network guarantees assistance around the world wherever an Iveco Bus vehicle is at work.

IVECO BUS employs over 5,000 people across five production units, in Annonay and Rorthais, France, Vysoké Myto, Czech Republic, Brescia and Foggia, Italy.
