

Press Release

IVECO BUS makes Metallica M72 tour in Europe more sustainable

IVECO BUS will provide a shuttle service for the Metallica's crew during the European leg of the M72 World Tour with sustainable mobility solutions.

*IVECO BUS will provide three low-impact vehicles for this eco-responsible tour: two electric **eDaily** minibuses and an XTL-compatible **EVADYS** coach – perfect solutions selected from the brand's sustainable offer.*

The vehicles will feature a special livery designed by Iveco Group's Centro Stile and inspired by the colours on Metallica's 72 Seasons album.

Vénissieux, 23 May 2023

IVECO BUS will provide a sustainable fleet to deliver a crew shuttle service to concert venues throughout the European leg of the Metallica M72 Tour. Two **eDaily** electric minibuses and an **EVADYS** coach with a latest-generation engine compatible with XTL alternative fuel will ensure the staff travels sustainably and comfortably.

*"Metallica's M72 tour is a perfect fit for IVECO BUS, a pioneer and expert in alternative energy vehicles," stated **Domenico Nucera, President, Bus Business Unit, Iveco Group**: "This tour, organised on environmental sustainability and social responsibility principles and attracting a wide international audience, is a perfect platform to showcase our portfolio of sustainable solutions suitable for all missions. Our low environmental impact vehicles for the tour demonstrate that we can meet different requirements while respecting natural resources, the environment and public health."*

The IVECO BUS sustainable fleet that will be used by the band's crew during their European tour will be made up of two **eDaily** electric minibuses and an **EVADYS** coach. For the occasion, a special livery taking inspiration from the colours featured on Metallica's 72 Seasons album was designed by the Centro Stile of Iveco Group.

The 2 **eDaily** minibuses can accommodate 19 and 22 passengers respectively. They are equipped with 3 batteries for a total capacity of 111 kWh and a synchronous electric motor delivering a maximum power of 140 kW (maximum torque of 400 Nm). The flexible charging mode allows charging at public charging facilities, industrial sockets, and domestic sockets quickly at up to 80 kW. The **eDaily** minibuses offer a range of 200 km, allowing them to cover a wide variety of missions – shuttle service, transport service for people with reduced mobility, and school transport – with zero local emissions.

The **EVADYS** is a 13-metre-long vehicle with a 400 hp (294 kW) Cursor 9 XTL compatible EURO VI-e engine. It can accommodate 63 seated passengers. To guarantee passengers the best conditions of comfort and safety, the vehicle is equipped with USB sockets, offers close to 12 m³ of luggage storage space, and incorporates the new ADAS (Advanced Driver Assistance Systems) devices in compliance with the GSR (General Safety Regulation) regulations. As a versatile and multi-tasking vehicle, **EVADYS** can accomplish any mission: from shuttle service to use by tour operators, from excursion coach to transport on regular routes.

The tour will stop in nine European cities from May 24th to July 14th: Munich, Milan, Vienna, Helsinki, Copenhagen, Oslo, Clisson, Warsaw and Madrid.

IVECO BUS

IVECO BUS is a brand of Iveco Group N.V. (EXM: IVG), a global leader in commercial and specialty vehicles, powertrain, and financial services, listed on the Borsa Italiana in Milan.

With a worldwide presence and a leading position in Europe in sustainable public transport, IVECO BUS supports public and private operators in all their missions, with an offer of global mobility solutions available in different energies, such as electric or powered by compressed natural gas compatible with biomethane.

The overall offer includes:

- school, intercity and tourism coaches;*
- standard and articulated city buses, including BRT dedicated versions; city midibuses*
- minibuses for all passenger transport missions.*
- connectivity and fleet management services available through IVECO ON*
- a portfolio of products and services with Energy Mobility Solutions, from simulations and design to the supply of charging stations, and installation and maintenance of the charging infrastructure*

The extensive IVECO BUS and IVECO service network guarantees assistance around the world wherever an Iveco Bus vehicle is at work.

IVECO BUS employs over 5,000 people across five production units, in Annonay and Rorthais, France, Vysoké Myto, Czech Republic, Brescia and Foggia, Italy.
