

Domenico Nucera

Chief Quality & Operations Officer

Domenico Nucera entered the powertrain business of the former Fiat Group in 2003, assuming various roles of increasing responsibility in process engineering, quality, manufacturing engineering and international operations at FPT Industrial and its predecessor companies.

Mr Nucera holds a Master's degree in Electronics Engineering from the University of Pisa, Italy.

When FPT Industrial was part of CNH Industrial, he served as Plant Director for the Turin Driveline Plant from 2013 to 2015, overseeing the production of axles and transmissions for IVECO trucks and buses. He then took over as Plant Director of FPT Industrial's Turin Engine Plant. In 2017 Mr Nucera became the Director of Powertrain Quality and in 2019 this role expanded to include Commercial and Specialty Vehicles as well. In 2020 he was named Vice President of Aftermarket Solutions for both Powertrain and Commercial & Specialty Vehicles.

With the foundation of Iveco Group in January 2022, Domenico Nucera was appointed President of the Bus Business Unit. In 2024 he also served a one-year term as Chairperson of the bus and coach division of the European Automobile Manufacturers' Association (ACEA). At the beginning of 2025 he was named Chief Quality & Operations Officer for Iveco Group.

At Iveco Group, Domenico Nucera is currently Chief Quality & Operations Officer.
